

What Will My Child Learn?

**FRIDAY**

## ***Infant Activity***

Make an edible cloud for sensory play! You can use heavy cream, full-fat coconut milk, or the liquid from a can of garbanzo beans (chickpeas) for this recipe. Any of these ingredients will work the same way. Place your liquid into a bowl and then beat with an electric mixer for two minutes, or until soft white peaks form. Invite your baby to feel the soft, fluffy cloud!

## ***Toddler Activity***

Make a bubble cloud (or try the infant recipe if your little one is likely to try a taste!) Use a tablespoon of baby soap and a half cup of water. Place in a bowl then use an electric mixer to whip the soap into a fluffy, bubbly cloud! Invite your toddler to touch and play with the cloud. Introduce a small bowl of water and ask questions: What will happen if you put some bubble cloud on top of the water? What might happen if you put the water on top of the bubble cloud? What if we try to mix them together? What will happen to the cloud?

## ***Preschool Activity***

Hidden in the Clouds! Use the recipe above for bubble clouds. Hide a few magnetic letters within the cloud. Encourage your preschooler to seek and name the letters, say the letter sound, think of words that begin with that sound and more!
